Instructions for Preparing Manuscript for Bulletin of Chemical Reaction Engineering & Catalysis (2019 Template Version) ← 16pt Times New Roman

FirstName LastName¹ *, FirstName LastName¹, FirstName LastName² ← 12pt, bold

¹ Chemical Reaction Engineering & Catalysis Group, Department of Chemical Engineering Diponegoro University, Semarang 50239, Indonesia

² Department of Chemical Engineering, Diponegoro University, ← 12pt, italic Semarang 50239, Indonesia ← 12pt, italic

* Corresponding Author. E-mail: istadi@live.undip.ac.id (I. Istadi), Telp: +62-24-7460058, Fax: +62-24-76480675

Abstract ← 12pt, Times New Roman, bold

Abstract should be clear, concise, and descriptive. This abstract should provide at least of “short background”, thus clear “objective of paper”, followed by the “short method used in this study”, then “brief summary of results or finding (not discussion)”. The abstract should end with a comment on the significance of the results or a brief conclusion. The abstracts are written in 12 pt Times New Roman, preferably not more than 300 words.

Keywords: ← 12pt, Times New Roman bold

Maximum of 5 keywords separated by semicolon (;), crucial to the appropriate indexing of the papers, are to be given. e.g.: Artificial Intelligence; Genetic Algorithm; Fuzzy Logic

1. Introduction ← 12pt, Times New Roman, bold

This template (downloadable at: http://ejournal2.undip.ac.id/download/author_guidelines_bcerc_2019.doc) is designed to assist Author in preparing manuscript; it is an exact representation of the format expected by the editor. To use this template, please just Save As this MS Word file to your document, then copy and paste your document text here. To copy and paste the text into this template document, please use “Special Paste” and choose “Unformatted Text”. Otherwise, please use Style Format in this MS Word file.

Bulletin of Chemical Reaction Engineering & Catalysis (e-ISSN 1978-2993), an international journal, provides a forum for publishing the novel technologies related to catalyst, catalysis, chemical reactor, kinetics, and chemical reaction engineering. Scientific articles dealing with the following topics in chemical reaction engineering, catalysis science and engineering, catalyst preparation method and characterization, novel innovation of chemical reactor, etc., are particularly welcome.

This journal encompasses original research articles, review articles, and short communications, including: fundamental of catalyst and catalysis; fundamental of chemical reaction engineering; kinetics studies of chemical reaction engineering; materials and nanomaterials for catalyst; kinetics studies of materials research; chemistry of catalyst and catalysis; applied chemical reaction engineering; applied catalysis; applied biocatalysis; applied bioreactor; membrane

*Corresponding Author.

bioreactor; chemical reactor design; catalyst regeneration; catalyst deactivation; surface chemistry of catalyst; biocatalysis; enzymatic catalytic reaction; kinetic studies of enzymatic reaction; industrial practice of catalyst; industrial practice of chemical reactor engineering; application of plasma technology in catalysis and chemical reactor; and advanced technology for chemical reactors.

All manuscripts submitted to this journal must be written in good English. Authors, for whom English is not their native language, are encouraged to have their paper checked before submission for English grammar and clarity. English language and copyediting services can be provided by: International Science Editing and Asia Science Editing. The work should not have been published or submitted for publication elsewhere.

2. Materials and Method

2.1 General Organization of Paper

The accepted paper will be published in BCREC journal after peer-reviewed for at least two reviewers. Once the manuscript is accepted, the article will be moved to Article In Press issue and sent to editing process to be layout-edited to the final version of BCREC article. After a suitable arrangement, the paper will be directly reproduced to the camera-ready format. Author will be contacted by Editorial Office of BCREC journal to proceed final proof reading correction. Once the article is ready for publishing, it will be moved to In Progress issue until launched formally.

According to Engelmore and Morgan [1], manuscript content should, in general, be organized in the following order: Title; Authors Name; Authors Affiliation; Abstract; Keywords; Introduction; Materials and Methods; Results and Discussion; Conclusions; Acknowledgements; and References.

2.2 Section Headings

Three levels of heading are allowed as follows: (a) Level 1 (Heading1 format) - 12pt, Times bold, left justified; (b) Level 2 (Heading2 format) - 12pt, Times, Title Case letter, left justified; (c) Level 3 (Heading3 format) - 12pt, Times, small letter, left justified.

2.3 Body Text

The body of the text is a set of body text paragraphs defined as follows: 12pt Times New Roman; One-half space, defined as 12pt; Spacing after the heading is 3pt; Spacing before the new heading is 12pt; Indentation for the first line is 1 cm.

2.4 Bullets and Numbering

In preparing paragraph of this BCREC journal, the bulleted and numbering within paragraph is not allowed. The item list should be prepared in descriptive paragraph style, separated by “;” and a spacing, followed by continuing item list.

2.5 Enumerated Lists

Lists are sequentially numbers as follows: (a) Spacing before the start of list is 3pt; (b) Spacing after the end of list is 3pt.

2.6 Tables

Tables are sequentially numbered with the table title and number above the table. Tables should be centered in the column OR on the page. Tables should be followed by a line space (12pt). Elements of a table should be single-spaced, however double spacing can be used to show groupings of data or to separate parts within the table. Table headings should be in 10pt bold. Tables MUST be referred in the text by the table number, e.g.: Table 1. Do not show vertical line in the table. There is only horizontal line should be shown within the table.

</tr>
</tbody>
</table>
2.7 Figures

Figures are sequentially numbered commencing at 1 with the figure title and number below the figure as shown in Figure 1. Detailed recommendations for figures are as follows: (a) Ensure that figures are clear and legible with typed letterings; (b) Black & white or colored figures are allowed; (c) If a figure spans two columns, it should be placed at the top or bottom of a page; (d) Hard copy illustrations should, preferably, be scanned and included in the electronic version of the submission in an appropriate format as follows: BMP - Microsoft bitmap file; WMF - Windows Metafile Format; EPS - Encapsulated Postscript; (e) If figures cannot be scanned, the original should be placed in its location within the manuscript using wax or colorless glue; (f) The following files are permissible: Microsoft Graph or Microsoft Draw. Figure 1 shows an included Microsoft Draw object.

2.8 Equations

Equations should be numbered serially within parentheses as shown in Equation (1). Equation should be prepared using MS Equation Editor (not in image format). The equation number is to be placed at the extreme right side.

\[ \int_0^\infty F(r,\varphi) \, dr \, d\varphi = \frac{\sigma r_c}{(2\mu_s)} \]
\[ \cdot \int_0^\infty \exp(-\lambda |z_j - z_i|) \lambda^{-1} J_0(\lambda r_j) J_0(\lambda r_i) \, d\lambda. \]

(1)

2.9 Units, Abbreviations, and Symbols

Metric units are preferred. Define abbreviations and symbols at the first time as they are introduced in the text.

**Figure 1.** A sample chart

3. Results and Discussion

3.1 Manuscript Heading, Font, and Spacing

Manuscript should be typed using word processors (Microsoft Word or Libre Office) software. The font used throughout the paper is Times New Roman. The paper size is A4 (i.e., 210 x 297 mm), two-column format (i.e., 85 mm each) with a 2.5 cm margin at the top, a 2.5 cm margin at the bottom, 2 cm margins on the left and right with a 1 cm space between the two columns. Lines are single spaced, justified. If the last page of your paper consists of less than two columns, then divide the last page text into two columns of equal length. Use high quality paper, printed on one side only with, preferably, a laser printer. Page numbers are not to be included in the text; they should be written on the back of pages at the bottom center using a pencil. Use of pronouns such as I, we etc is to be avoided.

Manuscript submitted to this journal should follow the main heading below, except for the review article: Title; Authors Name; Authors Affiliation; Abstract; Keywords; Introduction; Materials and Method; Results and Discussion; Conclusions; Acknowledgments; and References.

3.2 Guideline for Writing Paper Title

This is your opportunity to attract the reader’s attention. Remember that readers are the potential authors who will cite your article. Identify the main issue of the paper. Begin with the subject or highlight of the paper. The title should be accurate, unambiguous, specific, and complete. Do not contain infrequently-used abbreviations.

The title of the paper should be in 16 pt bold Times New Roman and be centered. The title should have 0 pts space above and 12 pts below.

3.3 Guideline for Writing Authors Name and Affiliations

Author(s) names should be typed without title and professional positions, such as: Prof, Dr, Production Manager, Lecturer, etc. Do not abbreviate your last/family name. Always give your First and Last names. For the case only one word of name, please just repeat the name as first and last names. Write clear affiliation of all Authors. Affiliation includes: name of department/unit, (faculty), name of university, address (if any), and country. Please indicate Corresponding Author (include email address) by adding asterisk (*) in superscript behind the name.
In brief, Introduction section should contain (Sub-sequentially): general background (max. one paragraph); short literature reviews or state of the art previous researches that justify the novelty and to show the scientific merit or novelties; thus gap analysis or novelty statement (why this research is important and what is scientific merit of this research compared to previous research stated in the state of the art); and objectives of this article.

The following is an example of novelty statement or the gap analysis statement in the end of Introduction section (after state of the art of previous research survey):

“……... (short summary of background)……... Thus, this research is important to do in order to solve the existing problems in the worlds...... A few researchers focused on ...... There have been limited studies concerned on ....... Therefore, this research intends to ............... The objectives of this research are .........”.

Or other ways to express the novelty statement or unique contribution of the paper.

3.6 Guideline for Writing Materials and Method

Materials and method should make readers be able to reproduce the experimental works. Provide sufficient detail to allow the work to be reproduced. Methods already published should be indicated by a reference, not rewritten similarly: only relevant modifications should be described. Do not repeat the details of established methods. For the chemicals, please provide details of brand and purity (example: CaO (Merck, 99.5%).

3.7 Guideline for Writing Results and Discussion

Results should be typed clearly and concisely. The results should summarize (scientific) findings rather than providing or explain data in great detail. Please highlight differences between your results or findings and the previous publications by other researchers.

The discussion should explore the significance of the results of the work, not repeat them. Please explore something related to scientific judgment of the findings which supported by facts. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.

In discussion, it is the most important section of your article. Here you get the chance to sell your data. Make the discussion corresponding to the results, but do not reiterate the results. Often should begin with a brief summary of the main scientific findings (not experimental results).

In brief, the following components should be covered in discussion: How do your results relate to the original question or objectives outlined in the Introduction section (what/how)? Do you provide interpretation scientifically for each of
your results or findings presented (why, scientifically)? Are your results consistent with what other investigators have reported (what else)? Or are there any differences?

3.8 Guideline for Writing Conclusions

Conclusions should only answer the objectives of research. Do not discuss again here. Tells how your work advances the field from the present state of knowledge. Without clear conclusions, reviewers and readers will find it difficult to judge the work, and whether or not it merits publication in the journal. Do not repeat the Abstract, or just list experimental results. You should also suggest future experiments and/or point out those that are underway.

3.9 Guideline for Writing Acknowledgment

Recognize those who helped in the research, especially funding supporter of your research. Include individuals who have assisted you in your study: Advisors, Financial supporters, or may other supporter i.e. Proofreaders, Typists, and Suppliers who may have given materials.

3.10 Guideline for Writing References

Cite the main scientific publications on which your work is based. Cite only items that you have read. Do not inflate the manuscript with too many references. Avoid excessive self-citations. Avoid excessive citations of publications from the same region. Check each reference against the original source (authors name, volume, issue, year, DOI Number). Please use Reference Manager Applications like EndNote, Mendeley, Zotero, etc. Use other published articles in the same journal as models.

All publications cited in the text should be included as a list of references. References are sequentially numbered as they appear in the text. Reference numbers are indicated in square brackets. Please ensure that every reference cited in the text is also present in the reference list (and vice versa).

Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either “Unpublished results” or “Personal communication”. Citation of a reference as ‘in press’ implies that the item has been accepted for publication and should be completed with DOI information.

As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list. Please ensure that the words ‘this issue’ are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

This journal has followed standard templates available in key reference management packages EndNote (http://www.endnote.com/support/enstyles.asp), Mendeley (http://www.mendeley.com), or other standard reference managers, using Modified-APA format. Using this plugin to word processing packages, authors only need to select the appropriate journal template when preparing their article and the list of references and citations to these will be formatted according to the journal style which is described below.

Recommendations for references are:
- Include ALL authors. et al., for multiple authors is not acceptable.
- When referencing in the body of text, use 12pt Times Roman in square brackets [1].
- Types of references are as follows:
  ◦ For a Book, see [1]
  ◦ For a Journal Article, see [2]
  ◦ For a Magazine Article, see [4]
  ◦ For a Proceedings Paper, see [5]
  ◦ For a Technical Report, see [6]
  ◦ For a Dissertation or Thesis, see [7]
  ◦ For an Internet Reference, see [8]

When preparing your reference list, the following should be avoided:
- References not cited in the text.
- Excessively referencing your own work.
- Insufficiently referencing the work of others.

It is also preferable when Authors give DOI number of each reference list in bracket [3], but it is optional for Authors. References list must be written consistently, whether the journal titles are written in short (i.e. Bull. Chem. React. Eng. Catal.) or in long format (Bulletin of Chemical Reaction Engineering & Catalysis). For short title of journals, please follow the standard here:

https://www.elsevier.com/_data/promis_misc/BMCL_Abbreviations.pdf or
Examples of guideline for preparing references list is described in the last section.

4. Conclusions

Papers not prepared in accordance with these guidelines, or not follow aims and scope, or manuscripts with number of mistakes will have to be pre-rejected by Editor. Submission of fulltext paper can be conducted by Online Electronic Submissions Interface at the following URL address:

https://ejournal2.undip.ac.id/index.php/bcrec

Currently, online version of BCREC articles in PDF format can be opened for free open access at BCREC website: https://bcrec.undip.ac.id, https://bcrec.id, https://bcrec.web.id, and/or https://ejournal2.undip.ac.id/index.php/bcrec.

Acknowledgments ← 12pt, Times bold

You may wish to thank those who have supported you and your work, especially for funding supporters. Do not acknowledge to one of authors.

References (Please provide DOI if possible) ← 12pt, Times bold
