**Title of Manuscript :** Characteristic Differenced Between Very Low Birth Weight Preterm Infants Who Experienced Weight Gain According to The Target and Not According to The Target on The Administration of Human Milk Fortifier

**Editor-in-Chief**

**Journal of Biomedicine and Translational Research**

Dear Prof. dr. Sultana MH Faradz, PhD,

On behalf of my co-authors, I am submitting the enclosed manuscript for possible publication in Journal of Biomedicine and Translational Research. In this original research article, we examined characteristic differences between very low birth weight premature babies underwent on-target and not on-target weight gain on the administration of human milk fortifier through a case control study and can confirm that there was no characteristic difference between both groups. Given the alarming increase of very low birth weight premature babies and the lack of research on very low birth weight premature babies, we believe that the findings presented in our paper will appeal to the doctors, pediatricians, and clinicians who subscribe to Journal of Biomedicine and Translational Research.

Should you select our manuscript for peer review, we would like to suggest the following potential reviewers because they would have the requisite background to evaluate our findings and interpretation objectively.

1. dr. Farid Agung Rahmadi, Msi.Med, Sp.A from Pediatric Medicine Department, Faculty of Medicine, Diponegoro University, email: faridrhmd@gmail.com
2. dr. Agustini Utari, Sp.A(K), Msi.Med from Pediatric Medicine Department, Faculty of Medicine, Diponegoro University, email: agustiniutari@lecturer.undip.ac.id
3. dr. Nahwa Arkhaesi, Sp.A, Msi.Med from Pediatric Medicine Department, Faculty of Medicine, Diponegoro University, email: narkhaesi@yahoo.co.id

To the best of our knowledge, none of the above-suggested persons have any conflict of interest, financial or otherwise.

Sincerely,

Diondra Eka Rizkiawan
